INTRODUCTION

Developer with over 4+ years of experience specializing in the creation of feature-rich web applications using modern front-end JavaScript frameworks. Demonstrated expertise in designing robust APIs capable of handling millions of hits per week. Possess academic research experience in container orchestration with Kubernetes. Proven track record of working in Agile teams, collaborating closely with design/ product teams, and prioritizing testing and quality assurance.

EDUCATION

- **University of New Brunswick** Fredericton, NB
Masters of Science in Computer Science (Graduate Research Assistant) - IBM-CASA Sep. 2019 – Dec. 2021
 - **Project:** Optimizing and Integrating Node.js on Distributed and Multi-core Clouds
- **Tribhuwan University** Kathmandu, Nepal
Bachelor of Engineering in Computer Engineering Oct 2012 – August. 2016

KEY SKILLS

- **Languages:** : Typescript, JavaScript, C#, JAVA, Python, LATEX
- **Frontend:** : HTML, CSS, SASS, Tailwind CSS, React.js, Vue.js, Angular.js, Nuxt.js, ASP.NET
- **APIs:** : Node.js, Express.js, Nest.js
- **Database:** : Microsoft SQL SERVER, MySQL, MongoDB
- **Testing:** : JMeter, Locust, Jest, Sinon, Mocha, tSQLt, React testing library, Browserstack
- **Infrastructure tools:** : Docker, Kubernetes
- **Others:** : Github, SonarQube, Jenkins, Jira, Web Accessibility, Technical writing

PATENT

- **Automatic cluster scaling based on varying workloads** (US patent - US11411886B1)

PUBLICATION

- **Supervisory Event Loop-based Autoscaling of Node.js Deployments** (2022 International Conference on High Performance Big Data and Intelligent Systems (HDIS), Tianjin, China)

EXPERIENCE

- **CommuniFi Fincentric (Previously S&P Global)** (Remote) Waterloo, ON
Software Developer Mar 2022 - Present
 - **Project:** E-brokerage applications for major banks and financial services companies
 - **Duties:**
 - Collaborated in an agile, distributed team to develop high-quality user experience and robust backend systems, seamlessly integrating real-time financial market data.
 - Led efforts in implementing best practices for releases and Git-based work flow, while ensuring optimal application monitoring with Grafana, Kibana, Dot-Com monitors, along with SonarQube for code quality analysis and the long-term maintainability.
 - Prioritized accessibility with WCAG 2.1 compliance, delivering inclusive user experiences throughout the project.
 - Build and Maintained and optimized stored procedures for efficient financial data retrieval, leveraging SSMS and tSQLt for rigorous testing.
 - Implemented innovative integration solutions with client applications, such as web components, Post Message API.
 - Utilized automated testing with Jest, Mocha, Sinon, React Testing Library, and Browserstack for comprehensive coverage and code quality.

• **Bridgs**

Fullstack Developer

Fredericton, NB

Oct 2021 - Jan 2022

- **Project:** BRIDGS

- **Duties:**

- Led a team in developing the MVP of our web platform, utilizing Agile methodologies for efficient collaboration.
- Orchestrated the deployment to AWS infrastructure and contributed to prototyping.
- Prioritized testing with Jest, Mocha, Sinon, and React Testing Library, and implemented CI/CD pipelines with Github actions for automated testing and deployment.
- Contributed to a collaborative environment, driving continuous improvement and delivering impactful solutions.

• **Pagevamp/Outside**

Web Developer

Kathmandu, Nepal

Feb 2018 - July 2019

- **Projects:** Pagevamp, Community Homestay, Ruslan Vodka, JGI

- **Duties:**

- Contributed to the development and enhancement of the core product - Pagevamp and collaborated on client projects Community Homestay, Ruslan, and JGI within the web team
- Involved in prototyping efforts using Sketch, translating concepts into intuitive user experiences and driving engagement.
- Architected and developed scalable backend services with Node.js, ensuring robustness and efficiency in data processing and management.
- Designed and implemented client-facing web applications, focusing on user-centric design and seamless functionality.

ACADEMIC PROJECTS

- **Database benchmarks with non-relational databases:** A formal comparison of a relational database, PostgreSQL done with several other NoSQL databases, such as MongoDB, Neo4j, HBase, using the TPC-H specification
- **Android-based ride sharing application:** An android application backed by a RESTful python backend for ride sharing, done as part of the requirement for Bachelors in Computer Engineering

AWARDS

- **Research fellowship grant with IBM Center for Advanced Studies - Atlantic:** 2019-2021
- **NB Innovation Foundation STEM and Social Innovation Award:** 2019

INTERESTS

- **Music:** Guitar
- **Sports:** Soccer, Table Tennis
- **Others:** Workout, Discussions on carbon neutrality, sustainable living
